

Energy Efficient Refrigeration

Save on costs with the new SunDanzer® 50 liter DC refrigerator or freezer. This new 50 liter ultra efficient unit has exceptionally low energy consumption requiring smaller, less expensive power systems and low operating expense.

High quality construction provides excellent reliability and long life. Super-insulated cabinets feature 11cm of polyurethane insulation with powdered-coated galvanized steel exterior and aluminum interior. A zero maintenance, brushless, thermostatically controlled DC compressor operates on 12 or 24 VDC. This chest-style refrigerator or freezer is easy to clean using the drain hole at the bottom of the unit.

With thick insulation and a refrigeration system optimized for solar, this new SunDanzer unit will provide outstanding economical and reliable operation.

Low energy consumption is the key that allows SunDanzer refrigerators and freezers to be cost effectively powered from solar, wind, fuel cells or batteries. This technology allows refrigeration in remote locations were it was previously unavailable or prohibitively expensive.
